

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

Ideal Goods for Terrarium・Paludarium

TERRA TAPE & TERRA LINE

Terra Tape is a self-adherent water retentive tape product for keeping from drying out by winding it around driftwood and creating an appropriate environment for growing epiphytes such as moss. Terra Line is a special thread product for securing plants such as epiphytic orchids to driftwood enabling it to secure without melting and breaking in the water. They both can be utilized for creating scenery of a jungle in a tropical forest in the area above water for both aqua terrarium and paludarium. We'll start announcing on our website and streaming videos to end-users from September 18th (Wed).

Terra Tape

Because it is a water retentive tape product with high absorbency, wind it around driftwood while leaving its end parts in the water and wind some moss on top of the tape. It can be used for drawing some water in by soaking its end parts in DOOA System Terra and the cascade part of Mizukusa Wall.

Terra Line

Unlike Moss Cotton, because it is synthetic fiber, it will not be melt and broken in the water. It can be used for winding moss and securing epiphytic plants to Terra Base.
